

# BiHELab GRANT

awarded to

**XXXX**

for participating in the

***6th Heidelberg Laureate Forum***

held in Heidelberg, September 23–28, 2018.

The Bioinformatics and Human Electrophysiology Lab (BiHELab) is an academic partner of the Heidelberg Laureate Forum Foundation.

The Bioinformatics and Human Electrophysiology Lab (BiHELab) of the Department of Informatics of the Ionian University, directed by Professor Panayiotis Vlamos, focuses on recent advances in neurodegeneration and system biology modeling, ranging from basic science to clinical and pharmaceutical developments. BiHELab's main goal is to create new diagnostic protocols for different types of dementia through tracing, mapping, analyzing, modeling and simulating all factors linked to submolecular malfunctions. Researchers at BiHELab help bridge the translational gap from data to models and from models to drug discovery and personalized therapy by fostering collaborations and developing original quantitative approaches to biological and clinical problems.
